Nokomis is currently offering two versions of the ADEC system. The ADEC system includes the ADEC Signature Analyzer, Integrated Antenna Enclosure (IAE), interconnect cables, software, and documentation.

ADEC Four channel – Four channel state-of-the-art high speed processing and analysis capability for detection and assessment of counterfeit electronics and cyber physical threats.

ADEC Two channel – Two channel system for detection of counterfeit electronics.

Service and support packages will be customized to client's needs and quoted with the above system.

Please select any desired options listed below to enhance your ADEC system.

<input type="checkbox"/> Internal and external solid state hard drive	<input type="checkbox"/> High-volume part insertion robot
<input type="checkbox"/> Label and report printers	<input type="checkbox"/> Additional I/O ports

Any information disclosed will be used solely by Nokomis and will not be distributed without prior consent.

If you are just interested in evaluation and testing of suspect microelectronics (counterfeit or otherwise), please contact our testing and services at [info@nokomisinc.com](mailto:info@nokomisinc.com) or call us (724) 483-3946.
